GraybaR CANADA | Schneider Electric

Automation Seminars 2025

Level II

Schneider Electric EcoStruxure Control Expert

A unique software platform to increase design, productivity and performance of your Modicon M340, M580, M580 Hot Standby, M580 Safety, Quantum, and Momentum. It opens doors to a complete range of new functions for improved productivity and collaboration. With the addition of the 984LL, migrations from any Modicon platform are possible with a simple conversion. Your software investment is maximized, training costs are reduced, and you benefit from unequalled development and compatibility potential.

Level 2

• Review basic principles of the software

• Create DDT

• Create a DFB

• Configure NOC card using DTM browser

• Configure Ethernet RIO in M580 system

• Link Unity application to a Vijeo Designer application

• And explore other interesting facets of the software such as
Importing 984LL, Trending, Linking Unity and Vijeo Designer
simulator.
