Automation Seminars 2025

Level I

Schneider Electric EcoStruxure Control Expert

A unique software platform to increase design, productivity and performance of your Modicon M340, M580, M580 Hot Standby, M580 Safety, Quantum, and Momentum. It opens doors to a complete range of new functions for improved productivity and collaboration. With the addition of the 984LL, migrations from any Modicon platform are possible with a simple conversion. Your software investment is maximized, training costs are reduced, and you benefit from unequalled development and compatibility potential.

Level 1

Seminar takes you through the basics of configuring a Programmable Controller using Control Expert Software.

All seminars are taught using a virtual environment.

Attendees require laptop with working camera and 2 monitors

Seminars are 9:00am–3:00pm and include:

2 x15 minute breaks and a 1-hour lunch
